

### IN THE CLAIMS

Please amend claims 1-11, stricken out or double bracketed material deleted, underlined material added, and add new independent claim 53 as follows:

---

1. (Currently Amended) A ~~method~~ reading product fabrication methodology for enhancing a presentation of text having an author specified text content and word order within the text content wherein the text presentation includes only author specified text content, said methodology comprising:

a) extracting text specific attributes from said text; and  
b) varying said text presentation in accordance with said attributes, while ~~substantially~~ maintaining said author specified word order.

2. (Currently Amended) The reading fabrication methodology ~~of A method for enhancing text presentation as recited in claim 1,~~ wherein said text specific attributes include text location within a text body, said text presentation includes background color[[,]] and ~~said presentation includes~~ varying said background color in accordance within said text location.

3. (Currently Amended) The reading fabrication methodology ~~of A method for enhancing text presentation as recited in claim 1,~~

wherein said text specific attributes include a text difficulty measure, and said text presentation includes an automatic text advancement rate[[,]] and ~~said presentation includes~~ varying said text presentation rate in accordance within said text difficulty measure.

4. (Currently Amended) The reading fabrication methodology  
A2 ~~of A method for enhancing text presentation as recited in claim 3,~~  
wherein said text difficulty measure includes an estimated pronunciation time of said text.

5. (Currently Amended) The reading fabrication methodology  
~~of A method for enhancing text presentation as recited in claim 3,~~  
wherein said text difficulty measure includes an estimated educational level of said text.

6. (Currently Amended) The reading fabrication methodology  
~~of A method for enhancing text presentation as recited in claim 1~~  
wherein:

- a) said attributes include punctuation and parts of speech;
- b) extracting includes parsing said text into punctuation and parts of speech;
- c) said varied text presentation is implemented using rules having inputs and outputs;

- d) said rule inputs including said parts of speech;
- e) said enhanced text presentation includes visual attributes; and
- f) said rule outputs including said visual attributes.

7. (Currently Amended) The reading fabrication methodology  
~~of A method for enhancing text presentation as recited in claim 6~~  
wherein:

- a) said rules include folding rules;
- b) said folding rules dividing said text into text segments;  
and
- c) said folding rule inputs include punctuation.

8. (Currently Amended) The reading fabrication methodology  
~~of A method for enhancing text presentation as recited in claim 7~~  
wherein said folding rule inputs further include parts of speech.

9. (Currently Amended) The reading fabrication methodology  
~~of A method for enhancing text presentation as recited in claim 8~~  
wherein said visual attributes include the displaying of said text segments in a color depending on said parts of speech.

10. (Currently Amended) The reading fabrication methodology  
~~of A method for enhancing text presentation as recited in claim 8~~

wherein said visual attributes include the displaying of said text segments on new lines.

11. (Currently amended) A method for enhancing presentation of text for a reading fabrication product, the presentation being faithful to having an author specified text content and sequence, said method comprising:

a) extracting text specific attributes from said text; and  
b) varying said text presentation quantitatively in accordance with said attributes[[,]] ~~while substantially maintaining said text sequence.~~

12. (Original) A method for enhancing text presentation as recited in claim 11, wherein said text presentation unambiguously represents said text sequence.

13. (Original) A method for enhancing text presentation as recited in claim 12, wherein said text presentation includes no non-textual symbols in association with said text.

14. (Original) A method for enhancing text presentation as recited in claim 11, wherein said text is displayed in a perspective view such that text segments above other segments appear to be further away from the reader, such that in reading

said text from bottom to top said text appears to be reading from front to back.

15. (Original) A method for enhancing text presentation as recited in claim 11, wherein said text presentation includes display of a plurality of text segments, each of said text segment displays having a starting horizontal and vertical displacement, wherein said horizontal and vertical displacements are varied quantitatively in accordance with said attributes.

A2 16. (Original) A method for enhancing text presentation as recited in claim 11 wherein said attributes include punctuation and parts of speech.

Claims 17-52 (Canceled)

53. (New) A method of fabricating a reading product utilizing an author-specified script wherein a display of text associated with the author-specified script is unambiguous, the method comprising the steps of:

- a) extracting text specific attributes from said author-specified script; and,
- b) varying said display of text associated with the author-specified script such that a simultaneous presentation of

multiple segments of juxtaposed text are meaningfully  
positioned in a multidimensional syntactic matrix.
